OBJECTIVE

A passionate and dedicated Java Trainer with 6 months of hands-on experience in teaching Java fundamentals and advanced concepts. Adept at creating interactive and engaging learning experiences for students, helping them build a solid foundation in Java programming. Seeking an opportunity as a software developer to further enhance my skills and contribute to the development and success of the organization.

PROFESSIONAL EXPERIENCE

Java Trainer   **May 2024 – Oct 2024**
Onesoft Technologies, Chennai

- Conducted hands-on training sessions for beginners and intermediate learners in Java programming.
- Assisted students in debugging code, providing one-on-one mentoring, and helping them overcome challenges.
- Created and maintained lab exercises, quizzes, and projects to reinforce learning concepts.
- Collaborated with other trainers to improve course material, keeping it up to date with the latest Java trends.
- Provided guidance on best practices for writing clean, efficient, and maintainable Java code.
- Evaluated student progress through regular assessments, feedback, and personalized coaching.

EDUCATION

M.Sc. Software Engineering   **Aug 2017- May 2022**
Annamalai University, Chidambaram
73%

COURSE

Java Full Stack Development   **Nov 2023– Apr 2024**
Onesoft Technologies, Chennai

PROJECTS

Event Web Application - Live

Admin Features:

- The admin can view the total number of users in the system.
- Added, updated, and deleted events, ensuring accurate and up-to-date event details.
- Enabled admin to view user bookings, event details, and customer information.

User Features:

- Users can view available events, including details such as date, price, and description.
- Logged-in users can easily book events and manage their bookings through their accounts.
- New users can sign up for an account, providing necessary information to register and access event booking features.

Responsive Design: Ensured the system was fully responsive across devices (desktop, tablet, mobile)

Technologies Used: React.js, Material UI, Spring Boot, PostgreSQL

Agro Website - <u>Live</u>

- Developed a responsive agro e-commerce website that facilitates the purchase of agricultural products.
- Users can explore a wide range of items, view product details.
- **Technologies Used**: HTML5, Bootstrap5, JavaScript

Moorthy Cafe Restaurant Website - <u>Live</u>

- Developed a responsive and user-friendly restaurant website, enabling customers to view the menu, explore offers, and contact the restaurant.
- Designed and implemented an interactive menu display with appealing visuals to enhance user experience.
- **Technologies Used:** HTML5, CSS3, JavaScript
